# FIND OF A LIFETIME!

Emily C. from Southwest England has been detecting for six years, but she considers her most recent find to be her best. While using her Garrett Apex, she dug this spectacular gold Henry VII half angel coin, circa 1505 to 1509. Follow her on Instagram and YouTube (metaldetectingemily) to see what she finds next. Congrats, Emily! And thanks for letting us share the video of your gold coin find.

<https://www.youtube.com/watch?v=5P5JyUaUSvk>

*Send in your Apex finds to be featured in the next Garrett Searcher!*

## FAMILY FUN!

Do you know where you can get permission to metal detect away from the crowds?

This could be the answer to getting the family outside, exercising, and having more fun together.

NEVER MISS A **TARGET** IN IRON INFESTED AREAS!

NEW

Provides improved target separation and increased maneuverability in tight areas.

## Garrett's Code of Detecting Ethics

Charles Garrett always urged his fellow searchers to conduct themselves as responsible treasure hunters and to leave their hunt areas in better condition than they found them. Please follow your local directives during the current health crisis, but when you are able to safely enjoy detecting, here are just a few of his keys to good conduct in the field:

- Never trespass or hunt on private property without permission.
- National and state parks/monuments, etc. are absolutely off-limits.
- Always fill in every hole that you dig.
- Do not leave litter or other discarded junk items lying around.
- Always carry out all rubbish and dug targets with you when you leave a search area.
- Use reasonable caution in digging toward any target, particularly in areas where you are uncertain of the ground conditions.
- Keep informed on and obey all local and national legislation relating to the discovery and reporting of found treasures.

THE USA**

## From The Field - real people making real finds

Miguel A. discovered his first seated coin (1853 silver half dime) while field testing the new Viper AT searchcoil for the AT series.
